BCDVIDEO™

Data Sheet

Environmentally Hardened NEMA Enclosures for durable, reliable protection

The BCDVideo Environmentally Hardened NEMA Enclosures are ideal for protecting equipment from harsh environments and tampering. Constructed from a durable PC+ABS Polycarbonate / ABS Blend, these environmentally hardened enclosures can be used to protect a wide range of equipment, from wireless and wired network devices to an environmentally hardened video server.

- PC+ABS Polycarbonate / ABS Blend for durability.
- Fully gasketed lids to keep contents safe and secure.
- Stainless steel latches with padlock hasps for added protection.
- Versatile mounting settings for flexible deployment.

KEY FEATURES

Environmentally hardened NEMA enclosure to protect video servers
