**BCD**

Purpose-Built Appliances Validated for Avigilon

Guaranteed performance with Avigilon Appearance Search™ functionality

BCD offers a variety of hardware builds for Avigilon Control Center (ACC) that have been tested and validated by our team of certified engineers to ensure maximum performance and a seamless user experience. Each system is pre-configured and pre-installed with the ACC license to provide integrators and end-users with a turnkey solution right out of the box.

Avigilon Appearance Search™

Internal testing in BCD's Innovation Center has validated the Appearance Search functionality on a variety of platforms, including the BCD-208X, BCD-214X, BCD-218X, BCD-226X and comparable Enterprise Performance Series appliances.

Why choose BCD for your Avigilon solution?

- **Tested & Validated** — Each system is specifically designed for the Avigilon VMS and is guaranteed to meet the performance requirements of ACC and Appearance Search.

- **Total System Security** — BCD utilizes an ISO 20243 certified supply chain, and each system is pre-configured with Dell-enabled Trusted Platform Module (TPM).

- **NDAA Compliant** — Every BCD appliance is fully compliant with the National Defense Authorization Act (NDAA) and does not contain any components from companies blacklisted by the federal government.

- **Unmatched Lead Times** — BCD averages five to seven days to ship appliances — not weeks or months.

- **Award-Winning Support** — With a dedicated, in-house, three-tier support team, BCD is your first call for remote support and troubleshooting.

- **Competitive Pricing** — More build options give integrators and end-users more flexibility, resulting in significant cost-savings.
